

About the Event

Set against the backdrop of rapid environmental change, the Earth EXPO 2026, an inter-school event, is themed "Sustainable Earth: Innovation, Environment & Technology," challenging young minds to explore the complex relationship between natural systems and human activities.

It aims to inspire students through Model Making and Poster Presentations to leverage geography and modern technology like GIS and remote sensing for innovative, practical solutions to environmental issues and foster global sustainability.

THEMES

- Energy and Conservation
- Environmental & Sustainability
- Green Cities
- Any other relevant matters
