

GREEN AND CLEAN CAMPUS POLICY DOCUMENT

St. Xavier's College, Burdwan

A Jesuit Institution

(Affiliated to the University of Burdwan)

Green and Clean Campus Policy

Green and Clean Campus Policy in a college setting is essential for promoting sustainability, cleanliness, and environmental responsibility among students, faculty, and staff.

1. Students must responsibly dispose of their trash using designated bins for recyclables, non-recyclables, and organic waste.
2. It is strictly prohibited to litter on campus grounds, including hallways, classrooms, and outdoor areas, and students are required to dispose of waste appropriately.
3. Students should use designated recycling bins for paper, plastic, metal, and glass to ensure proper separation and recycling of waste materials.
4. After meals in canteen and campus, students are expected to clean up by disposing of trays, utensils, and food waste in designated bins.
5. Maintain cleanliness in common areas such as libraries, study rooms, and sports facilities by disposing of trash and personal items properly.
6. Promptly report any maintenance issues, such as broken bins or overflowing trash cans, to campus authorities for timely resolution.
7. Cooperate with janitorial staff by keeping pathways clear and assisting in keeping shared spaces tidy and organized.
8. We will implement policies to minimize single-use plastics like straws, utensils, and containers across campus.
9. Encourage the use of reusable alternatives such as water bottles, coffee mugs, and food containers among students and staff.
10. Recycling waste paper for creative projects such as preparing pencils and handmade cards to promote sustainability.
11. Collaborate with Burdwan Municipality to manage daily solid waste effectively, including biodegradable and non-biodegradable materials.
12. Establish composting programmes for food waste from campus canteens and gardens to reduce organic waste.

13. Implement water conservation measures through efficient plumbing and sustainable landscaping practices, alongside awareness campaigns.
14. Maintain cleanliness through regular cleaning schedules, waste collection services, and responsible waste disposal practices.
15. Conserve energy by turning off lights, fans, computers, and other electronics when not in use, and support energy-efficient practices throughout campus facilities.
16. Opt for eco-friendly transportation options such as using bi-cycle or eco-bike, walking to reduce carbon emissions associated with commuting.
17. Participate in maintaining campus gardens, green spaces, and tree planting initiatives to enhance biodiversity and improve air quality.
18. Continuously evaluate and adopt new sustainable practices, technologies, and policies to foster a culture of environmental responsibility on campus.
19. Encourage innovation and research in waste reduction technologies and sustainable practices within the campus community.
20. Students are encouraged to participate actively in scheduled campus clean-up drives to contribute to maintaining a clean environment.
21. Educate the campus community on the environmental benefits of paper recycling through awareness campaigns and active participation.
22. Engage students, faculty, and staff in community outreach programmes to raise awareness and promote sustainable practices.
23. Conduct workshops, seminars, and campaigns to educate the campus community on waste reduction, recycling, composting, and sustainability.
