### **" Industrial Visit"**

### **Report**

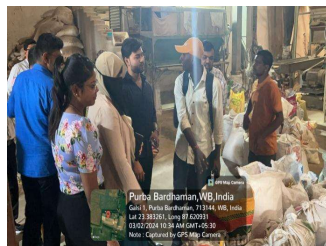

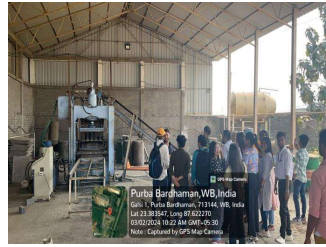

On 2nd March, 2024, The Department of Business Administration organizes "Industrial Visit". The visit began at 08:00 A.M. at A-MIN Rice Mill, Paraj Station Road, Galsi, West Bengal 713406. There were a total of 29 students along with the faculties of Department of Business Administration. The main motive of this industrial visit was to help students to understand the rice production process.

The primary goal of the industrial visit was to provide students with a comprehensive understanding of the rice milling process. This includes observing the machineries and technology used, understanding quality control measures, and gaining insights into the operational and management aspects of a rice mill. Additionally, the visit aimed to shed light on the environmental and economic impacts of rice milling.

Students observed the entire rice milling process, starting from the reception to storage of paddy. They learned about the importance of moisture control and storage conditions. They witnessed the cleaning and de-husking process and how impurities are removed and the husk is separated from the paddy.

The industrial visit to the rice mill was an enriching experience for the students. It provided a comprehensive understanding of the rice production process, the technology involved, and the operational challenges faced by the industry. Such visits are invaluable for enhancing practical knowledge and preparing students for their future careers.
