

REPORT

Outreach Activity by the Department of Sociology in collaboration with 'Speed' NGO, Burdwan.

2022-2023

For the Social Outreach Activity, the Department of Sociology took the students to Burdwan Railway Station on 14th January 2023 at 11 am. Sociology students along with their faculties visited the underprivileged homeless children residing at the Burdwan Railway station to enquire about their lifestyle, daily issues, and negative consequences associated with their identity, etc.

As a Sociology student, it is essential to understand in depth, the 'social problems' around us that affect our Society. While interacting with around 40 children, it was understandable that despite hectic planning, welfare programs, legislation, and administrative actions, a substantial portion of Indian children still remain in distress and turmoil due to inadequate mental, physical, and cultural needs.

The students extended their helping hands with whatever means that they could like kites, snacks, chocolates in return of their illuminated faces. It was a different experience in the field which will surely reflect in their theoretical studies. Apart from the academic aspect, this experience also broadened their horizons about humanity and service to society.
