- **EVENT DETAILS:**

World Elder Abuse Awareness Day was launched by the International Network for the Prevention of Elder Abuse and the World Health Organization to promote a better understanding of the abuse and neglect of elderlies by raising awareness of the various factors that affect the quality of life of the elderlies. United Nations estimated that between 2019 and 2030, the number of people aged 60 years or over will grow by 38%, from 1 billion to 1.4 billion globally. Also, by 2050, 1 in every 6 people aged 65 or over, will experience violence in some form or the other. Elder abuse is a worldwide problem that demands a multifaceted response to protect the rights of the elderly and to improve their quality of life. Making the young generations more aware and responsible to address violence, abuse, and neglect of the elderly population is an important task in this scenario.
